

Deepak Arya

Full Stack Developer (MERN Stack)

deepakarya20112000@gmail.com | [+91 6394147481](tel:+916394147481) | [Pune](#) | [Portfolio](#) | [Linkedin](#) | [Github](#)

Summary

Full Stack Developer skilled in MERN stack with experience building real-time applications ([Socket.IO](#)), secure JWT-based authentication systems, and scalable REST APIs. Built and deployed 3+ production-ready projects. Seeking entry-level SDE/Full Stack role to apply strong DSA and problem-solving skills.

Technical Skills

Languages : JavaScript (ES6+), HTML5, CSS3, SQL, Python (Basic)

Frontend : React.js, Bootstrap, React Router, Responsive Design, DOM Manipulation

Backend : Node.js, Express.js, REST APIs, JWT Authentication, Authentication & Authorization

Database : MongoDB, MongoDB Atlas

Tools : Git, GitHub, VS Code, Postman, Vercel, Railway, Render

Concepts : CRUD Operations, MVC Architecture, API Integration, Responsive Web Design, Real-Time Communication, Client-Server Architecture, Version Control, Object-Oriented Programming (OOP), Data Structures & Algorithms (Basic), Problem Solving

Experience

Freelance Full Stack Developer

May 2026 – June 2026

Mr.Rishi (YouTube Creator)

- Developed a full-stack MERN-based CMS to streamline YouTube video workflow, reducing manual content-tracking effort by an estimated 40%.
- Implemented secure JWT-based authentication with role-based access control for content management.
- Designed a responsive React.js dashboard with Dark Mode, improving usability across devices.
- Built 10+ REST APIs using Express.js and Node.js for content CRUD, script uploads, and workflow tracking.
- Integrated MongoDB Atlas for scalable content storage, managing 20+ videos in a centralized pipeline.

Projects

Real-Time Chat Application

- Built a real-time one-to-one chat application supporting instant message delivery with sub-second latency using [Socket.IO](#).
- Implemented secure JWT-based authentication with protected routes and session management.
- Designed persistent chat history storage in MongoDB, enabling users to retrieve past conversations instantly.
- Developed a fully responsive UI using React.js, ensuring seamless experience across desktop and mobile devices.
- Optimized WebSocket connection handling to support 50+ concurrent users without performance degradation.

Career Job Portal

- Developed a full-stack MERN job portal enabling users to browse, search, and apply for job listings.
- Implemented complete CRUD functionality for job postings, allowing employers to create, update, and manage 100+ job listings.
- Built advanced job search and filtering system (by location, role, and category), improving search relevance for users.
- Developed secure user authentication and role-based access for job seekers and employers.
- Connected React.js frontend with Express.js/Node.js backend via RESTful APIs, ensuring smooth data flow and <300ms average response time.

TaskFlow Manager

- Developed a full-stack task management application to help users organize and track daily tasks efficiently.
- Implemented complete CRUD operations for creating, updating, and deleting tasks in real time.
- Added task status management (To-Do, In Progress, Completed) with dynamic status updates reflected instantly in the UI.
- Built a responsive dashboard using React.js, providing an intuitive drag-and-drop-style task organization experience.
- Designed MongoDB schema to efficiently store and query 500+ task records with optimized read/write performance.

Education

Bachelor of Technology (B.Tech)

Lucknow | 2026

Dr. A.P.J Abdul Kalam Technical University
